

Assignment

Tech Stack to be used:

- React.js (mandatory)
- Any state management (Context API, Redux, Zustand, etc.)
- Form library optional

Submission

- Submission to be done by uploading code on GitHub and sharing git repo.
- Bonus points if project is also deployed using any free hosting.

1. Authentication

Implement a simple login screen which allow 2 types of logins:

- Admin user having full access: create, read, edit, delete. Username will be admin and password will be admin123.
- Staff user having restricted access: create and read only. Edit and Delete buttons must be hidden or disabled in the voucher listing table. Username will be staff and password will be staff123.

On login, store the user role in local state or context. Protect all routes unauthenticated users should be redirected to the login screen. Provide a logout option.

2. Create Form

- Refer sample photo for cols required.
- Voucher Type is a dropdown having options: Payment and Received
- Narration col should have default: 'On Account' text which auto-clear on focus.
- Each row includes: Account (dropdown), Amt, TDS Applicable (Yes/No), TDS Type (conditional)
- Plus button append new row while cross button removes the row.
- Independent row state
- Totals should automatically update based on the voucher type. The total debit amount will be displayed in the Total DR Amount field, while the total credit amount will be shown in the Total CR Amount field.

The image shows a sample UI for a Voucher Entry form. The form has a header bar with buttons 'Show All', 'Add New Voucher', 'Create Account', and 'Voucher Entry | Create', and a 'Save' button. Below the header, there are input fields for 'Group' (CASH), 'Voucher No' (1), 'Date' (29-04-2026), 'Voc Type' (Payment), 'Remarks', 'Account Head' (Select Account Head), and 'Closing Bal'. Below these fields is a table with columns: Account Head, Narration, Bill No, Amt, Mode, Reference No, Voc Type, TDS, and Action. The table has one row with values: Select Account Head, On Account, Select, , NA, , Debi, Nc, and a plus/cross icon. At the bottom, there are fields for 'Total DR Amt', 'Total CR Amt', and 'Bill Ref Module Totals'.

Account Head	Narration	Bill No	Amt	Mode	Reference No	Voc Type	TDS	Action
Select Account Head	On Account	Select		NA		Debi	Nc	+X

Total DR Amt: Total CR Amt: Bill Ref Module Totals

Sample UI for reference

3. Index

- Columns: Date, Type, Narration, Total Debit, Total Credit
- Actions: Edit, Delete (Admin only)
- Filters: Date range, Voucher Type, Narration search

The image displays a sample user interface for a voucher entry system. At the top, there is a form with several input fields: 'From Date' (01-04-2026), 'To Date' (31-03-2027), 'Voucher Type' (ALL), 'Mode' (ALL), and 'Account Head' (ALL). Below these are 'Party Name' (ALL), 'Breakage' (Month Wise Total), 'From Voc No' (e.g. V0001), and 'To Voc No' (e.g. V0050). A red 'Search' button is located to the right of the 'To Voc No' field. In the top right corner, there are three icons: a plus sign, a green 'x', and a red document icon. Below the form, there is a section titled 'Voucher Entry | Index'. It contains a table with the following headers: VOC DATE, VOC NO, MODE, TYPE, ACCOUNT HEAD, NARRATION, DEBIT, CREDIT, and ACTION. The table body is currently empty, and a red message 'Data Not Found' is displayed in the center.

VOC DATE	VOC NO	MODE	TYPE	ACCOUNT HEAD	NARRATION	DEBIT	CREDIT	ACTION
Data Not Found								

Sample UI for reference

4. Edit Form

- Prefill form showing saved values.
- Reuse same create form.
- Only admin can access this page.
- Display toastr alert when data updated successfully.

5. Delete

- Confirmation dialog.
- Only admin can access this operation.
- Display toastr alert when data updated successfully.
